

# Status: Held for Document Update (1)

## RFC 4231, "Identifiers and Test Vectors for HMAC-SHA-224, HMAC-SHA-256, HMAC-SHA-384, and HMAC-SHA-512", December 2005

Source of RFC: IETF - NON WORKING GROUP

Area Assignment: sec

Errata ID: 3853

**Status: Held for Document Update**

**Type: Editorial**

Reported By: Antonio Bueno

Date Reported: 2013-12-30

Held for Document Update by: Sean Turner

Date Held: 2014-01-12

Section 4.4 says:

```

Key          aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa
             aaaaaaaaaa                (20 bytes)
Data =      ddddddddddddddddddddddddddddddd
             ddddddddddddddddddddddddddd
             ddddddddddddddddddddddddddd
             dddd                      (50 bytes)

```

It should say:

```

Key =      aaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaaa
             aaaaaaaaaa                (20 bytes)
Data =      ddddddddddddddddddddddddddddddd
             ddddddddddddddddddddddddddd
             ddddddddddddddddddddddddddd
             dddd                      (50 bytes)

```

Notes:

Notice the equal sign missing after "Key"

spt: This is clearly editorial and no implementer is going to be confused by this so I marked it hold for document update.
